

Dear All

To check your mail through web browser like Internet explorer, Firefox or Safari

Type the following at your browser address bar:

www.yourdomainname.x/webmail

Type your full E-mail address at the e-mail e.g. [anyone@yourdomainname.x](mailto: anyone@yourdomainname.x)

Type your password

You can use any of the three software “Horde, Squirrel mail or round cube” to check our mail, also you can change your password from this location,

To change password click on small arrow at the top right corner, which lies between your E-mail address and Logout, click on “password and security” and then type your new password.

To edit, create and delete Mail boxes and other stuff:

Log into your control panel:

www.yourdomainname.x/cpanel

User name:

Password:

The 1st icon at the 4th group of icons is the E-mail Accounts from It you can create and modify your mail accounts.
